

UNDERSTANDING SERVERS IS OUR BUSINESS.

As an Intel® Technology Provider, understanding servers is our business. Today's Intel® Xeon® processor-based servers can run business applications up to **1.43X faster**^{1,2} enabling you to access information and respond to customers sooner from any device on your network. Let us focus on your server so you can focus on your business.

INTEL INSIDE. BETTER BUSINESS OUTSIDE.
More Powerful. More Reliable. More Secure.

1. Software and workloads used in performance tests may have been optimized for performance only on Intel® microprocessors. Performance tests such as SPECint*_rate and MobileMark* are measured using specific computer systems, components, software, operations, and functions. Any change to any of those factors may cause the results to vary. You should consult other information and performance tests to avoid you in fully evaluating Intel contemplated purchases, including the performance of Intel products when combined with other products.
2. Baseline system: Intel® Xeon® Processor E3-1275 v2, Intel HD graphics P400, Western Digital WD2000FFYZ HDD, 8GB, vLS-2.6.32-276, AC90NBY/BBC, IC13. Previous generation: Intel Xeon Processor E3-1276 v3, X105LMM-LM42, Intel HD graphics P400, 16 GB (4 x 4GB DDR3-1600MHz ECC, 100MHz), Western Digital WD1000GB HDD, 8MB, vLS-2.6.32-451, 3.1a, IC14. New Configuration: Intel Xeon Processor E3-1275 v3, Intel HD graphics P400, 8GB (2 x 4GB DDR4-2133MHz ECC, 100MHz), Intel SSD 540 Series 320GB model SSD540S320, CentOS 7 - 3.10.0-1.2.2.el7.x86_64, 9kL25X1 800 X000.800.1501.1.201746, IC14.
*Other names and brands may be claimed as the property of others.

Our x86 architecture-based server systems ensure performance, quality, and reliability to solve the most complex business challenges. Thanks to the Intel® Xeon® processors families, E4's guarantees a revolutionary leap in performance and capabilities to next-gen data center, running on software defined infrastructure, supporting an agile cloud architecture and a highly-efficient traditional workload management.

E4. WHEN PERFORMANCE MATTERS
